Medieval Astrology Profile for Elizabeth Cady Stanton

File History: Initial 18-Dec-2015; Tables Revised 7-Jun-2016

Introduction to delineation of appearance and character in natal astrology. The following document is a hand-written analysis of **Elizabeth Cady Stanton**, using the principles of medieval predictive astrology. The discipline of natal astrology focuses on the fate of an individual based on a horoscope cast for the moment of birth. Within natal astrology, the 1st house occupying the eastern horizon at birth describes the native: physical vitality, appearance, and character. Between the Hellenistic and Medieval eras several specialized models were developed to assess these characteristics. They include **longevity** (vitality and length of life), **physiognomy** (form and shape of the face and body), **victor of the chart** (overall life purpose), **manners** (social conduct including ethical behavior), and **temperament** (elemental mix of fire, earth, air, and water with applications in medical astrology). Prior research has presented models and results for longevity (*A Rectification Manual: The American Presidency*, Chapter 4) and physiognomy (*Astrological Physiognomy: History and Sources* & *Astrological Physiognomy: Empirical Tests of the Leo Rising Decan*).

Victor of the Chart. Included are two competing models for computing the victor of the chart said to be the single most powerful planet in the horoscope. According to Plato's follower Porphyry, by configuration in the natal horoscope the planet signifying the victor of the chart shows the life choice made by the soul prior to incarnation. Plato explains the details of his soul model in *The Myth of Er* found in the closing pages of his work *The Republic*. Porphyry and his peer Antiochus offer specific rules for determining the victor of the chart. The method of Antiochus/Porphyry is compared to a later method for determining the victor suggested by the Jewish Rabbi Abraham ben Meir ibn Ezra, a philosopher and astrologer active in the 12th century. For a discussion of these two models, see the companion paper *Victor of the Chart: Testing Methods of Antiochus/Porphyry and Ibn Ezra*, which serves as a key to what is presented here.

Manners. Plato was not alone among Greek philosophers in conceiving models for the soul. Aristotle's model of vegetative, sensitive, and intellective soul levels (assigned respectively to the plant, animal, and human kingdoms) was taken up by Ptolemy, who found a correspondence between the sensitive and intellective soul and Moon and Mercury in the natal horoscope. Configuration of the Moon and Mercury, with special emphasis given to their rulers, is a second method for analyzing the soul. Ptolemy introduces this model in *Tetrabiblos III.13* "Of the Quality of the Soul.*"* Subsequent authors refer to this model as "Significators of the Soul" or "Manners." A summary template for the Moon and Mercury is presented in the paper and will be further developed in future versions.

Elizabeth Cady Stanton (November 12, 1815 – October 26, 1902)

Elizabeth Cady Stanton was an American suffragist, social activist, abolitionist, and leading figure of the early women's rights movement. Her Declaration of Sentiments, presented at the Seneca Falls Convention held in 1848 in Seneca Falls, New York, is often credited with initiating the first organized women's rights and women's suffrage movements in the United States. Stanton was president of the National Woman Suffrage Association from 1892 until 1900.

Before Stanton narrowed her political focus almost exclusively to women's rights, she was an active abolitionist with her husband, Henry Brewster Stanton and cousin, Gerrit Smith. Unlike many of those involved in the women's rights movement, Stanton addressed various issues pertaining to women beyond voting rights. Her concerns included women's parental and custody rights, property rights, employment and income rights, divorce, the economic health of the family, and birth control. She was also an outspoken supporter of the 19th-century temperance movement.

After the American Civil War, Stanton's commitment to female suffrage caused a schism in the women's rights movement when she, together with Susan B. Anthony, declined to support passage of the Fourteenth and Fifteenth Amendments to the United States Constitution. She opposed giving added legal protection and voting rights to African American men while women, black and white, were denied those same rights. Her position on this issue, together with her thoughts on organized Christianity and women's issues beyond voting rights, led to the formation of two separate women's rights organizations that were finally rejoined, with Stanton as president of the joint organization, approximately twenty years after her break from the original women's suffrage movement. Stanton died in 1902 having authored both *The Woman's Bible* and her autobiography *Eighty Years and More*, along with many articles and pamphlets concerning female suffrage and women's rights.

<u>Stage I. Determine the Ascendant sign</u>

Firdaria

The following life affairs favor the diurnal Firdaria sequence:

Moon-Saturn. 24-Feb-1848 to 6-Jun-1869. Seneca Falls Convention, 19-Jul-1848.
Saturn-Moon. 16-Apr-1865 to 10-Nov-1866. American Equal Rights Assn. formed, 10-May-1866.
Moon is universal significator of women. Saturn/Aquarius combines the law (Saturn) and fairness (Aquarius).

Jupiter-Mars. 29-Jul-1868 to 15-Apr-1870. National Woman Suffrage Assn formed as a splinter group away from American Equal Rights Association which supported the 15th Amendment which allowed freed slaves to vote, but still denied women the right to vote, 15-May-1869.

Major Sun. 11-Nov-1890 to 14-Apr-1892. Resignation speech "Solitude of Self", 20-Feb-1892. Note in the final rectification Sun will be placed in the 12th house.

Conclusion: Figure is diurnal

Moon's Configuration

For a diurnal figure there are two possible configurations of the Moon:

6:53 AM – 12:14 PM	Moon/Pisces separates from Mercury and is VOC
12:14 PM – 4:35 PM	Moon/Aries applies to Saturn

Moon: Pisces or Aries? Stanton's body size was large; she was a lady who struggled with her weight. Though there can be other configurations besides the Moon which are related to body size, choice of the phlegmatic Moon/Pisces is a better match to excessive weight.

Moon's Configuration: With the choice of Moon/Pisces there is only one configuration. Does the Moon's separation from Mercury and VOC position make sense? A major life theme was Stanton's use of her pen as a speech writer, often ghost writing for Susan B. Anthony which allowed the more moderate Anthony to deliver speeches sufficiently fiery to survive in the rough and tumble world of American politics. That Stanton wrote the speeches and let others do the talking is consistent with this configuration. Note also passage of women's suffrage occurred after Stanton's lifetime.

Conclusion: Moon/Pisces separates from Mercury and is VOC.
The Ascendant sign range is 19SC15 to 2AQ23

Configuration of the Chart

A strong life theme of Stanton's was her unwillingness and displeasure to be in the spotlight. Specifically in regard to delivery of her own speeches and convention attendance. Nevertheless the political fight for women's suffrage was a key theme. There is one Ascendant which meets both of these life themes: Sagittarius rising places the Sun/Mercury/Scorpio conjunction in the 12th house and the Venus/Jupiter/Libra conjunction in the 11th house. The 11th is politics; 12th is confinement and scandal. With regard to scandal, it is significant that her father Henry Stanton was forced to resign from the Port Authority in 1863 for financial irregularities because his son (and Elizabeth's brother) had stolen goods from the Port Authority. This event will surface in Stage III rectification with a Sun-Midheaven solar arc direction which matches her father's notoriety.

Conclusion: Ascendant is Sagittarius

Death of Susan B. Anthony's father, 25-Nov-1862.

While this is a horoscope of Elizabeth Cady Stanton and not Susan B. Anthony, their partnership at times functioned like a marriage; in cases like these death of a partner's parent can still be timed by one's own luminaries (This is speculative, but it is my opinion based on life affairs).

Father Henry Stanton in NYT letter admitted that his son Neil had stolen good from the Port Authority, 6-Nov-1863; in response to rumors published 1-Nov-1863. Resigned shortly thereafter.

Stanton's draft of the *Declaration of Sentiments* read at the Seneca Falls Convention 19/20-Jul-1848 stands as a milestone in the history of women's rights in the United States. Many motivations for the convention existed. Within Elizabeth Cady Stanton's timeline, her introduction to the Quaker Lucretia Mott at the 1840 World's Anti-Slavery Convention held in London was a key event. Eight years later, Stanton helped organize the Seneca Falls Convention with Lucretia Mott and other local women. As the author, Stanton's *Declaration of Sentiments* is a delineation match to the Mercury – Lot of Fortune directions for the month following the convention. The Jupiter-MC directions preceding the convention most likely timed the formation of alliances with men who also chose to attend the convention. Finally, the Saturn-MC directions, with Saturn/Aquarius placed in the 3rd house ruling the 10th/11th houses by exaltation, appear to have added the rule of law to the convention with Stanton's Declaration patterned after the 5-Jul-1776 USA Declaration of Independence.

Physiognomy

Ascendant sign: Sagittarius
Ascendant sign ruler: Jupiter/Libra
Ascendant decan: Aries
Ascendant decan ruler: Mars/Aries-rx
Planets/Nodes placed in the Ascendant sign or decan: South Node/Sagittarius in rising sign

Longevity: 86y 11m 13d

Releaser and kadukhudhāh. Figure is diurnal but Sun in the 12th is disqualified. Moon/Pisces/4th qualifies as releaser. Bound lord Saturn aspects by sextile. Either Saturn in his own sign is the kadukhudhah or Jupiter as the victor is the kadukhudhah.

If Saturn, Saturn grants 57 major years; benefics Jupiter and Venus add 12 and 8 minor years respectively by trine aspect without reception. Net is 77 years. Adding another 90.4 months for Jupiter and Venus' middle years as months (an addition I am started to make less and less based on experience) adds another 7.54 years getting closer to actual longevity. 77 year is too short but consider Stanton made her final "Solitude of Self" NAWSA resignation speech on 20-Feb-1892 at age 76y 3m 9d which is very accurate for timing the end of Stanton's life affairs.

If Jupiter as victor, then Jupiter grants 79 major years. Now additions and subtractions become more problematic. Both Jupiter and Venus are in the same sign and Venus receives Jupiter. If Venus adds 8 minor years, then 79 + 8 = 87 which is accurate. But we have to stop there without deducting Mars' 15 minor years by opposition aspect and Saturn's 30 minor years by trine aspect with reception. That's a bit arbitrary.

Victor of the Chart: Jupiter/Libra

Ibn Ezra's method favors Venus, Mars, or Jupiter. Porphyry's expanded Stage I criteria ranks Mars and Jupiter as the two high scoring planets. Within Porphyry's criteria see that Jupiter has three different points in the bounds of Jupiter; Mars has zero points in the bound of Jupiter. Jupiter over Mars is an easy choice because Jupiter is in the strongest possible solar phase, is elevated in the horoscope, is placed in his house of joy. Empirically, Jupiter also times the ratification of the 19th Amendment.

Manners: Mars-Venus
