

Medieval Astrology Profile for Benjamin Franklin

V.1. 12-Dec-2007. 1:43:14 PM, ASC 16GE11'19"; V.2. 7-Feb-2021. 9:03:02 AM, ASC 29AQ09'55"

Introduction to delineation of appearance and character in natal astrology. The following document is a hand-written analysis of Benjamin Franklin, using the principles of medieval predictive astrology. The discipline of natal astrology focuses on the fate of an individual based on a horoscope cast for the moment of birth. Within natal astrology, the 1st house occupying the eastern horizon at birth describes the native: physical vitality, appearance, and character. Between the Hellenistic and Medieval eras several specialized models were developed to assess these characteristics. They include **longevity** (vitality and length of life), **physiognomy** (form and shape of the face and body), **victor of the chart** (overall life purpose), **manners** (social conduct including ethical behavior), and **temperament** (elemental mix of fire, earth, air, and water with applications in medical astrology). Prior research has presented models and results for longevity (*A Rectification Manual: The American Presidency*, Chapter 4) and physiognomy (*Astrological Physiognomy: History and Sources & Astrological Physiognomy: Empirical Tests of the Leo Rising Decan*).

Victor of the Chart. Included are two competing models for computing the victor of the chart said to be the single most powerful planet in the horoscope. According to Plato's follower Porphyry, by configuration in the natal horoscope the planet signifying the victor of the chart shows the life choice made by the soul prior to incarnation. Plato explains the details of his soul model in *The Myth of Er* found in the closing pages of his work *The Republic*. Porphyry and his peer Antiochus offer specific rules for determining the victor of the chart. The method of Antiochus/Porphyry is compared to a later method for determining the victor suggested by the Jewish Rabbi Abraham ben Meir ibn Ezra, a philosopher and astrologer active in the 12th century. For a discussion of these two models, see the companion paper *Victor of the Chart: Testing Methods of Antiochus/Porphyry and Ibn Ezra*, which serves as a key to what is presented here.

Manners. Plato was not alone among Greek philosophers in conceiving models for the soul. Aristotle's model of vegetative, sensitive, and intellective soul levels (assigned respectively to the plant, animal, and human kingdoms) was taken up by Ptolemy, who found a correspondence between the sensitive and intellective soul and Moon and Mercury in the natal horoscope. Configuration of the Moon and Mercury, with special emphasis given to their rulers, is a second method for analyzing the soul. Ptolemy introduces this model in *Tetrabiblos III.13* "Of the Quality of the Soul." Subsequent authors refer to this model as "Significators of the Soul" or "Manners." A summary template for the Moon and Mercury is presented in the paper and will be further developed in future versions.

Benjamin Franklin

Benjamin Franklin (January 6, 1705 O.S./January 17, 1706 N.S. to April 17, 1790)

In lieu of a capsule biography, here is the National Park Service's Resume for Franklin:

BENJAMIN FRANKLIN
Market Street
Philadelphia, Pennsylvania

Career Objective:

Secure a challenging position or positions in which I can apply my collaboration, mediation and relationship-building skills to create a better world

Educational Background:

- Completed two years of elementary education
- Participated in self-education program, reading the works of Plutarch, Daniel Defoe and Cotton Mather, among others (lifetime activity)
- Awarded honorary degrees from Harvard and Yale (1753)
- Awarded honorary Master of Arts degree from William and Mary College (1756)
- Awarded honorary Doctor of Laws degree from the University of St. Andrews, Scotland (1759)
- Awarded honorary doctorate degree from Oxford University, England (1762)

Professional Experience: (Selected highlights only)

Printer

Progressed from apprentice to owner/proprietor of printing office; proficiency in all forms of printing with particular expertise in the printing of currency

- Served as apprentice to master printer James Franklin in Boston (1718-1723)
- Co-founded Philadelphia printing office with partner Hugh Meredith (1728)
- Launched one of the nation's first printing franchises in South Carolina (1731)
- Selected as official printer for colonies of Pennsylvania, Delaware, Maryland and New Jersey (beginning in 1731);printed currency for New Jersey and Pennsylvania (beginning in 1735)

Author and Publisher

Wrote and published numerous pamphlets and articles that influenced colonial decision makers, ultimately leading to independence from England; demonstrated scope of writing abilities by authoring books and articles for general population

- Authored a series of letters to my brother's newspaper, my own, and others under various pseudonyms, including Silence Dogood, Alice Addertongue and Harry Meanwell (beginning in 1722)
- Published *A Dissertation on Liberty and Necessity, Pleasure and Pain* (1725)
- Purchased and published *The Pennsylvania Gazette*; introduced innovative journalistic policy of presenting various sides of an issue (1729)
- Wrote and published *A Modest Enquiry into the Nature and Necessity of a Paper Currency* (1729)
- Published *Poor Richard, An Almanack*, one of the colonies' first best-sellers (1732-1757)

- Launched *Philadelphische Zeitung*, America's first German-language newspaper (1732, closed after two issues)
- Published *The General Magazine and Historical Chronicle*, one of the first magazines in the nation (1741)
- Published America's first political cartoon in *Plain Truth*, a pamphlet about the importance of working together and improved military preparedness (1747)

Civil Servant

Initiated new services to improve the quality of life in the colonies; served in a variety of leadership positions to assure the execution lived up to the vision

- Established The Library Company, the nation's first, successful public lending library (1731)
 - Introduced bills and/or influenced governing bodies to provide numerous municipal services and amenities, including street lighting and cleaning, paved streets and nighttime constable patrols (1730s -1750s)
 - Lobbied for and organized Union Fire Company, one of the first fire protection programs in Philadelphia (1736)
 - Appointed Clerk of the Pennsylvania Assembly (1736)
 - Held various positions of increasing responsibility in the colonies' postal service; served as Postmaster of Philadelphia; named Deputy Postmaster General for North America; mapped postal routes throughout the colonies; established colonies' first Dead Letter Office; served as Postmaster General for North America; appointed postmistress of Boston (the first woman to hold public office) (beginning in 1737)
 - Founded the Academy and College of Philadelphia, later renamed the University of Pennsylvania (1749)
 - Co-founded Pennsylvania Hospital, the first public hospital in the colonies (1751)
 - Led consortium of fire companies to establish the Philadelphia Contributionship, the colonies' first insurance company (1752)
 - Selected by Pennsylvania, Georgia, New Jersey and Massachusetts to serve as colonial agent; later served as unofficial spokesman for all 13 colonies (1757-1775)
 - Served as chairman of the Pennsylvania Committee of Safety (1775-1776)
- President of the Pennsylvania Government [Governor] 1785-1788.
Served as president of the Pennsylvania Society for Promoting the Abolition of Slavery (1787-1790)

Statesman and Diplomat

Served as key member of the team that overthrew existing rule of King George III over 13 North American colonies; provided input and influenced establishment of a new form of self-government; secured international support and assistance

- Drafted *Plan of Union* (1754), which laid the groundwork for the *Articles of Confederation* (1776-77)
- Elected as Pennsylvania's delegate to Second Continental Congress (1775)
- In England, assisted in efforts to repeal the Stamp Act (1766)
- Served on committee that drafted the *Declaration of Independence* (1776)

- As a Commissioner of Congress and Ambassador to France;represented the colonies interests with both the French and Spanish governments; negotiated with French and Spanish ministers to provide United States with military support in war against Britain; secured loans to help finance American Revolution ;assisted in negotiating the four-way *Treaty of Paris* with France, Great Britain, Spain and America (1776-1783)
- Signed the three key documents that established America as an independent nation: *Declaration of Independence* (1776), the *Treaty of Paris* (1783) and the *U.S. Constitution* (1787)
- Served as a delegate to the Constitutional Convention to address management, defense, the economy and other problems confronting 13 disparate states (1787)
- Participated in debates that resulted in theUnited States Constitution; influential in guaranteeing individual rights and devising a balance of three branches of government; encouraged other delegates to sign the U.S. Constitution (1787)

Environmentalist

Took early leadership role in recognizing need to preserve the environment

- Led environmental protest against polluting slaughter houses, tan yards and skinner lime pits on the public dock (1739)
- Organized a fundraising drive to support John Bartram's trips to the South to collect plant specimens (1742)

Inventor

Conceptualized, designed and/or improved many devices that enhance quality of life

- Swim fins (ca. 1717)
- Franklin/Pennsylvania stove (winter of 1740/1741)
- Lightning rod (1750)
- Street lamps that were easier to repair and clean (1756)
- Better ways to keep streets cleaner and deal with waste management (1750s)
- Discovered that electricity existed in storm clouds, in the form of lightning(1752)
- Flexible catheter (1752)
- Improved colonial postal system, as Deputy Postmaster General (1753-1774)
- Three-wheel clock that was simpler than other designs (1757)
- Glass armonica, a musical instrument made of spinning glass (1762)
- Bifocals (1784)
- Long arm (extension arm) to reach high books (1786)

Scientist and Meteorologist

Satisfied curiosity about weather and its impact on the environment through research and a series of experiments

- Accurately theorized the existence of high and low pressure and proposed one of the first correct explanations for storm movement in the northern hemisphere (1743)
- Organized the first American voyage to explore the Arctic (1753)
- Charted first map of the Gulf Stream currents and temperatures for the purpose of increasing speed of ocean travel (1768)

Musician

- Composed ballad in commemoration of the capture of Blackbeard the Pirate (1719)
- Invented glass armonica for which both Mozart and Beethoven composed several pieces to feature the instrument (1762)
- Played the viola da gamba, violin, and harp

Other Awards and Honors

- Awarded Copley Medal of the Royal Society of London for electricity research (1753)
- Namesake of the *Franklinia alatamaha* tree, a flowering tree propagated by botanist John Bartram (1765)
- Inducted into the Hall of Fame For Great Americans (1900), International Swimming Hall of Fame – Honor Contributor (1968), Electrostatics Hall of Fame (1979), Cooperative Hall of Fame (1987), American Mensa Hall of Fame (1990) and the U.S. Chess Hall of Fame (1999), among others

Rectification

Available Birth Data

Astrodatbank reports a DD 'dirty data' birth time of 10:30 AM. Records are consistent that Franklin was born across the street from Boston's Old South Meeting House on Sunday morning 7-Jan-1706 O.S. and was baptized 'the Sunday morning of his birth' according to church records. Accounts vary, but the presumption is Franklin was born early enough on Sunday morning sufficiently early so that he could be taken across the street and baptized during the regularly scheduled Sunday service. Astrodatbank presents proposed rectified times of 1:30 AM, 9:37:20 AM, 10:58 AM, 11:00 AM, and 9:40 PM.

In A Rectification Manual (2008), I proposed a trial rectification of 1:43:14 PM with an Ascendant of 16GE11'19". Part of the motivation for that rectification was choice of Gemini rising as a delineation match to Franklin's intellectual curiosity. In this revised rectification, I am motivated more by Zodiacal Releasing from Spirit to choose a time of 9:03:02 AM with an Ascendant of 29AQ09'55". In the 2008 trial rectification Mercury rules the Ascendant sign; in the revised 2020 rectification, Mercury/Aquarius-rx influences the Ascendant sign by position.

Proposed Rectification

Benjamin Franklin
6-Jan-1706 AD JC
17-Jan-1706 AD GC
9:03:02 AM
LMT +04:44:15
Boston, MA
71w03'37
42n21'30
ASC 29AQ09'55"

Stage I. Determine the Ascendant sign

Firdaria. The following events favor the diurnal Firdaria sequence:

Major Mercury – 1724/1736. Began printing business in 1724.

Major Jupiter – 1757/1768. Happiest five years of his life are described as his years in England between 1757/1762. Jupiter/Cancer is exalted.

Major Mars – 1769/1775. Approach to Revolutionary War. Franklin’s earlier successful attempts in reigning in the Stamp Act (1766) were not repeated.

Major North Node – 1776/1778. Named Commissioner to the French Court, Helped negotiate an alliance with France during 1778.

Major South Node – 1779/1780. Dispute with John Adams. Unsavory.

Moon’s Configuration

| Time | Moon’s Degree | Sect | Configuration |
|----------|---------------|------|---|
| 12:00 AM | 28AQ56 | N | Moon separates from Mars and is VOC |
| 1:43 AM | 00PI00 | N | Moon applies to Venus |
| 7:31 AM | 3PI31 | D | Moon applies to Venus |
| 11:15 AM | 5PI47 | D | Moon separates from Venus and applies to Saturn |
| 4:50 PM | 9PI10 | N | Moon separates from Venus and applies to Saturn |
| 10:59 PM | 12PI54 | N | Moon separates from Saturn and applies to Mars |
| 12:00 AM | 13PI31 | N | Moon separates from Saturn and applies to Mars |

In my 2008 rectification, I delineated Saturn/Taurus as the practical application of science for mankind and favored the Moon’s separation from Venus and application to Saturn. Venus/Capricorn in mutual reception with Saturn/Taurus does link the two planets closely and makes it difficult to determine how the Moon’s application to Venus, or the Moon’s separation from Venus and application to Saturn might produce a distinctly different set of life themes which makes it possible to choose one configuration over the other. As ZRS analysis shows below, the Moon’s application to Venus proves the better configuration, despite arguments I made in 2008.

Zodiacal Releasing from Spirit

Choice of Capricorn as the sign of the Lot of Spirit is an easy match to life affairs. Key event:
L1 Capricorn – L2 Cancer loosing of the bond. Breaks printing apprenticeship with Brother James, sailed for New York, Philadelphia, and London as he begins his printing career.
L1 Aquarius – L2 Leo loosing of the bond. Winds up active printing career and begins scientific experiments including the famous kite and key experiment conducted during a lightning storm.
L1 Aries. Finds himself ‘in the cockpit’ before the British Privy Council 9 days after the start of L1 Aries. The key event which radicalizes Franklin in favor of Independence.

Conclusion: If the L.Spirit is in Capricorn, then the corresponding Ascendant range is 6AQ45 – 7PI29. Based on Franklin’s intellectual curiosity, I favor Aquarius over Pisces as the Ascendant.

Configuration of the Chart

An Aquarius Ascendant is consistent with the following life affairs:

South Node/Scorpio/10th ruled by Mars/Sagittarius/11th signifies a diminished career and reputation from political alliances, organizations, and individuals who are fractious and violent. As the final rectification will show, the Hutchinson letter affair was timed by dynamic activity of Mars and timed his humiliation before the British Privy Council on 29-Jan-1774 which radicalized Franklin to the cause of independence for the colonies.

Sun/Capricorn/12th (Sun in the bound of Mars) with Mars/Sagittarius/11th signifies infamy and secret arms deals with Silas Deane and Beaumarchais in France as the revolution broke out. The configuration also signifies fame from municipal firefighting organizations.

Mercury/Aquarius-rx/1st in the house of his joy is consistent with Franklin’s intellectual curiosity.

Stage II. Determine the Ascendant’s range within 1-4 degrees

Lots

Lot of Marriage 22LI38/7PI22.

1-Sep-1730, Married Deborah Reed, dsa Mercury 7PI18 conj antisicia of L.Marriage.

19-Dec-1774. Death of Deborah Reed, trSouth Node 7PI25 conj antisicia of L.Marriage.

Lot of Accusation, Exile, and Injury 21CA28/8GE32

29-Jan-1774. Placed in cockpit before UK Privy Council, dsa Saturn 21CA15 conj the lot.

Stage III. Determine the exact Degree and Minute of the Ascendant

Solar Arc Directions

2-Apr-1722. csa MC sextile Sun

23-Apr-1722. dsa Sun sextile MC

25-Jul-1722. csa ASC conj Mercury

15-Aug-1722. dsa Mercury conj ASC

First published letter of the pseudonymous author ‘Silence Dogood’ published, 2-Apr-1722.

Writes another 13 letters under same penname. Assumed identity of a middle aged woman with strong progressive ideas on women’s rights and other issues. Identity revealed on October 1722 which hurt relations with his brother James, editor of the paper, as BF upstaged him.

Sun/12th is consistent with a secret penname. Mercury/1st in his joy placed in the bound of Venus/Aquarius takes up women’s issues.

15-Sep-1751. *csa MC sq Sun*

7-Feb-1752. *dsa Sun sq MC*

First fire insurance company, as proposed by BG, is formally organized, 7-Sep-1751.

Pennsylvania Hospital opened at 8th and Spruce streets in Philadelphia, 6-Feb-1752.

Sun/12th of hospitalization is a delineation match; and per discussion made in Stage I Configuration of the Chart, Sun in bound of Mars with Mars/Sagittarius/11th (out of sect malefic) ties BF' fame and honor to organizations pertaining to fire.

Note: These events are also timed by the primary direction of the MC to the Sun (see below).

2-Jul-1773. *csa ASC conj Mars*

20-Apr-1774. *dsa Mars conj ASC*

****This solar arc pair forms the bookends to the most volatile events of the Hutchinson affair.****

BF clandestinely obtained Hutchinson letters, Dec-1772

Hutchinson letters read to Massachusetts assembly against Franklin's advice.

Hutchinson letters published in Boston Gazette, mid-June-1773.

BF published anti-British policy satires "Rules by Which a Great Empire May Be Reduced to a Small One" and "Edict by the Kind of Prussia", Sep-1773.

William Whately accused John Temple of taking the Hutchinson letters resulting in a duel which left Whately slightly injured, ear-Dec-1773.

BF published letter admitting he was responsible for acquisition and transmission of letters to avoid a second duel between Whately and Temple, 25-Dec-1773.

Mass assembly petitions England for removal of Governor Thomas Hutchinson, 25-Dec-1773.

News of the Boston Tea Party reached London, Jan-1774.

Ben condemned in public in UK over "Hutchinson Affair", 11-Jan-1774.

Franklin was accused of stealing the Hutchinson letters, excoriated and denounced as thief by Solicitor General Alexander Wedderburn before the Privy Council. BF is blamed for the entire colonial rebellion. Franklin refused to respond to Wedderburn's accusations. "In the Cockpit - KEY LIFE EVENT", 29-Jan-1774.

Franklin removed from his position as Deputy Postmaster General in America by the British government, 31-Jan-1774.

Effigies of Wedderburn and Hutchinson carted through Philadelphia, hanged, and burned by electricity, 3-May-1774.

KEY – Mubtazz Scoring

Single point: assigns 1 point for each essential dignity

Early medieval: sign 5, exaltation 4, bound 3, primary triplicity lord 2, decan 1. Used by al-Kindī and Māshā'allāh.

Late medieval: sign 4, exaltation 4, triplicity lords (all) 3, bound 2, decan 1. Used by Schoener; taught by Zoller.

Fixed Stars from Janus 4.3 software. Criteria: conjunction within 2 degrees longitude.

Additional

Moon's Configuration: Moon applies to Venus, diurnal, conjunctional.

Moon-Mercury whole sign aspect? No. Moon and Mercury are inconjunct.

Do scoring methods agree? No. Saturn-Jupiter (sign-based); Venus (bound-based).

Model Summary

(for model details see www.regulus-astrology.com/research.html)

Physiognomy

Ascendant sign: Aquarius

Ascendant sign ruler: Saturn/Taurus

Ascendant decan: Libra

Ascendant decan ruler: Venus/Capricorn

Planets/Nodes placed in the Ascendant sign or decan: n.a.

Longevity: 84y 2m 29d

Releaser and kadukhudhāh. Figure is diurnal but Sun in the 12th is disqualified. Moon/Pisces/2nd qualifies as the releaser. Sign lord Jupiter/Cancer is in the sign of its exaltation, has the acronycal rising solar phase, and receives the Moon by trine aspect. Jupiter grants 79 major years. He lived another five years but his health deteriorated after his 79th birthday until his death.

Victor of the Chart: Venus/Capricorn

Ibn Ezra's method favors Mars or Saturn but Porphyry's Stage I criteria highlights Venus. Not only is Venus/Capricorn in mutual reception with Saturn/Taurus, but Venus is 10th from the Lot of Fortune 6AR28 which is placed in Venus' bound. So far in this victor study, placement of the Lot of Fortune's bound lord 10th from the lot is a powerful testimony for the victor when ranking victor candidates.

Manners: Saturn-Jupiter (sign-based); Venus (bound-based).
